BAJDOURI Zouhair Cybersecurity Student | Software Developer | DevSecOps zouhairbjdr@gmail.com
Fès Maroc, Morocco +212684660027

Education

Bachelor's Degree in Cybersecurity of Connected Intelligent Systems (CSIC) **2026-2027**
Ecole Supérieure de Technologie Fès
University Diploma of Technology (DUT) in Network & Security Management **2024-2026**
Ecole Supérieure de Technologie Fès

Professional Experience

AllEdge **Apr 2026 – Present**
Systems & Security Developer Intern Remote, Casablanca

- Developed an edge connectivity agent in Rust using WireGuard tunnels and the NATS messaging bus.
- Developed a Wazuh SIEM connector in Rust to collect, normalize, and publish security events in OCSF/Avro format to Redpanda.
- Implemented a Zenarmor event normalizer in Rust, mapping network activity events to OCSF and publishing telemetry through NATS.
- Designed and maintained cross-platform CI/CD pipelines (Linux, macOS, and Windows) using GitHub Actions.

Keywords**: Cybersecurity, SIEM, Network Security, Edge Computing,Distributed Systems,Wazuh, OCSF,CI/CD,Docker.**

XAVS Labs **Oct 2025 – Apr 2026**
Full-Stack Developer Intern Remote, Accra

- Developed dynamic and responsive web interfaces using React and Next.js.
- Developed and maintained RESTful APIs using Django.
- Designed, managed, and optimized PostgreSQL databases.

Keywords**: Full-Stack, Backend, Frontend, REST APIs, Database Management, PostgreSQL, React, Next.js, Django.**

Elevvo Pathways **Sept 2025 – Sept 2025**
Machine Learning Specialist Intern Remote, Cairo

- Built and evaluated machine learning models using Scikit-learn, TensorFlow, and Python.
- Prepared, cleaned, and preprocessed datasets using Pandas and NumPy.
- Created data visualizations and interactive dashboards using Matplotlib and Seaborn.
- Evaluated model performance and extracted actionable insights from experimental results.

Keywords: **Machine Learning, Artificial Intelligence, Predictive Modeling, Data Preprocessing, Model Evaluation.**

VNB-IT **Jul 2025 – Aug 2025**
Full-Stack Developer Intern Remote, Paris

- Developed RESTful APIs using Django.
- Developed responsive user interfaces using React.
- Implemented real-time features using WebSockets.
- Designed and maintained PostgreSQL databases using Django ORM.

Keywords: **Full-Stack, Backend, Frontend, REST APIs, Real-Time Systems, WebSockets, Database, PostgreSQL.**

Personal Projects

PennyPilot: Developed a full-stack budget management application featuring expense tracking and financial analytics.
TCP/IP Protocol Modeling: Developed a MATLAB simulation of the TCP/IP protocol stack to analyze packet transmission and network behavior.
Devtinder: Developed a full-stack job matching web application connecting job seekers with relevant opportunities.

Skills

Programming Languages: Rust • Python • JavaScript • C
Frameworks: React • Next.js • Django • Flask
Cybersecurity & Systems: WireGuard • Wazuh • SIEM • OCSF • Docker • NATS • GitHub Actions
